

# Max

Fan heater

NYIGF™

Stadler Form®  
OF SWITZERLAND

# Max – turns up the heat!

Max's heater elements warm the air, which is then blown quietly into the room, to create an agreeable temperature. Max heats during the transition period, when the main heating is not switched on – Max warms the feet in a cold office – Max makes cold rooms pleasantly warm. Max is versatile! Max blows cold air or hot air with 800 to 2'000 watt power output. The desired temperature is fully adjustable. Thermal overload protection fitted.
